Connected System Design Project (EGE205)
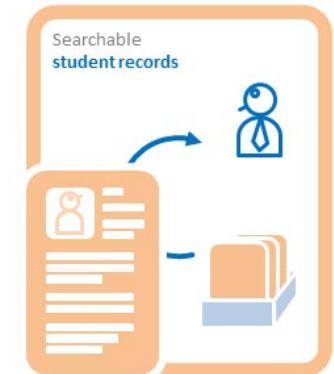

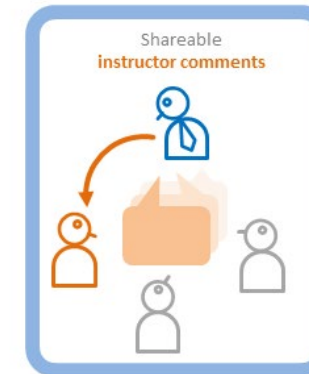

Introduction to TEAMMATES

Introduction to TEAMMATES

What is TEAMMATES?

- It is a software platform designed for **Student Peer Evaluations / Feedback.**

- It is designed by a team of **teachers and students from NUS**.

- It aims to provide a powerful peer feedback and peer evaluations mechanism with a very high degree of flexibility.

Why use TEAMMATES?

For Student

- It provides an opportunity for **self-reflection** and **peer-evaluation** while working as a team for a project.

For Lecturer

- It provides an **alternate avenue** to understand the **team dynamic** as well as **individual performance** in a team.

How is TEAMMATES works?

- Email from TEAMMATES will be sent to your NYP email (Week9-12, Week17).

- Evaluation session will be opened from **Monday 0830** on the starting week and **Sunday (2359)** on the closing week.

- Answer **ONLY** 5 questions **truthfully** as it **will help you** and **your team mates** to **understand yourself and themselves better**.
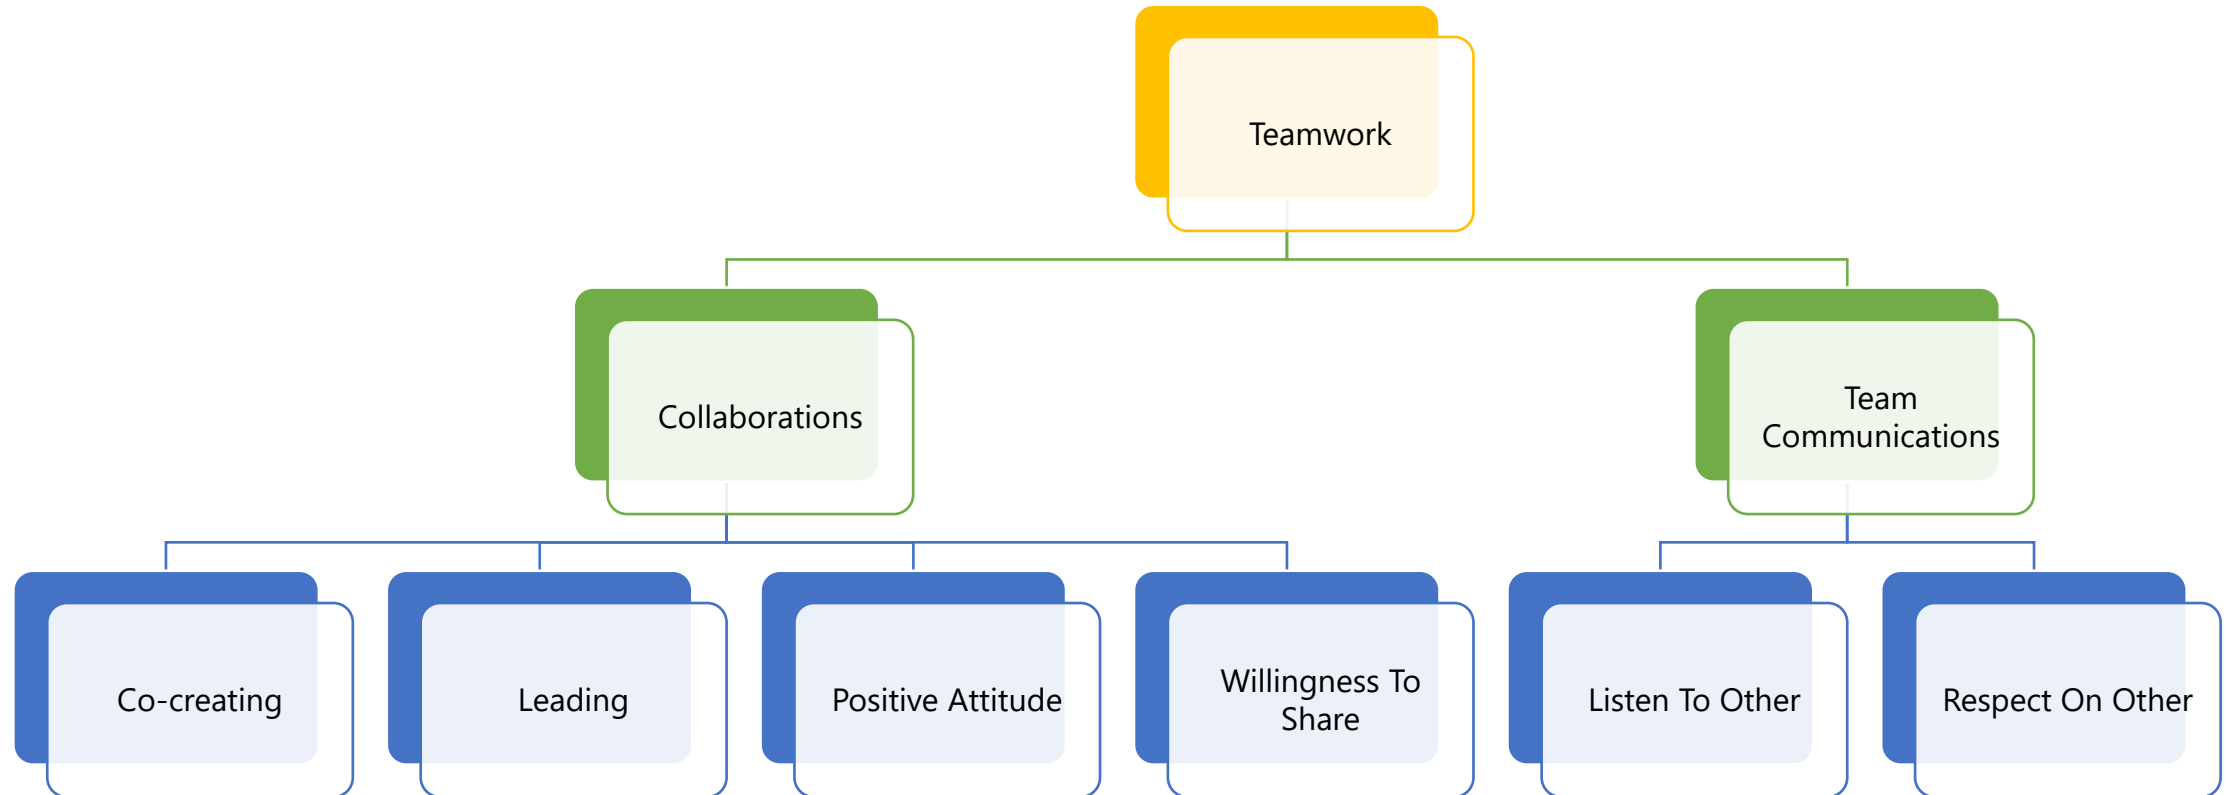

How is TEAMMATES works?

- You will receive another **evaluation result** email from TEAMMATES after each evaluation session is closed.

- **Carefully look through** the evaluation result and **reflect** on yourself on how you can improve and do better in the subsequent week.

What are the Evaluation Criteria?

```
                        Teamwork
               ┌───────────┴───────────┐
         Collaborations          Team Communications
    ┌──────┬──────┬──────┐         ┌──────────┬──────────┐
Co-creating Leading Positive  Willingness  Listen To   Respect On
                    Attitude   To Share     Other        Other
```

What TEAMMATES is NOT

- It is **NOT** a tool to shape the perception on an individual in a team.

- It is **NOT** a tool to demotivate or demoralize an individual in a team.

- The evaluation result **DOES NOT** count towards the individual weightage.

A tool
is designed to bring endless benefits if it is used in a right manner.
Conversely,
It can bring great harm if it is used in the wrong way.
